

WHEAT

Tri-Cure

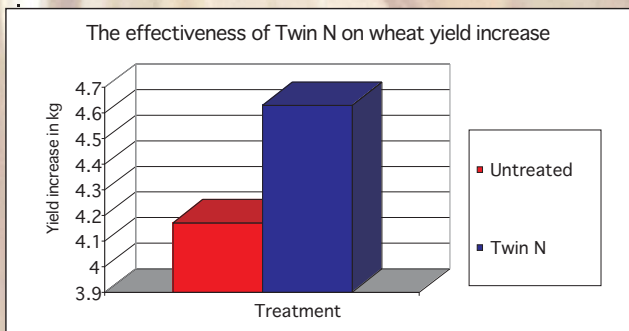

Left untreated vs. right treated with Aweganic Tri-Cure at 1 g/kg seed

Conclusion

From the above graphs and diagram you can see that Aweganic Tri-Cure will control various wheat soil diseases. Achieve these great results on your farm by making Aweganic Tri-Cure a standard practice on your farm.

Twin N

Conclusion

Twin N can be recommended to supplement synthetic sources of nitrogen fertiliser for wheat. It is however recommended that application be applied earlier than the flag leaf stage.

No till-irrigation wheat (100 kg seed/ha)
