Agri-Cure SP Registration No: L 8549 Act 36 of 1947
Active Ingredient: Potassium Bicarbonate 850g/Kg
Registration Holder: N Laboratories (PTY) LTD - Reg No.: 2015/165672/07

Agri-Cure SP

Fungicide

Agri-Cure SP is a novel combination of potassium salt for use as a fungicide for the control of powdery mildew and scab on apples, powdery mildew on grapes and scab on cucurbits.

Agri-Cure contains potassium bicarbonate and novel compounds to increase spreading and wetting on the leaf to increase efficacy and decrease the risk of burn.

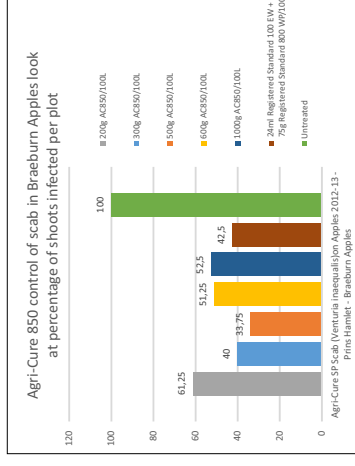

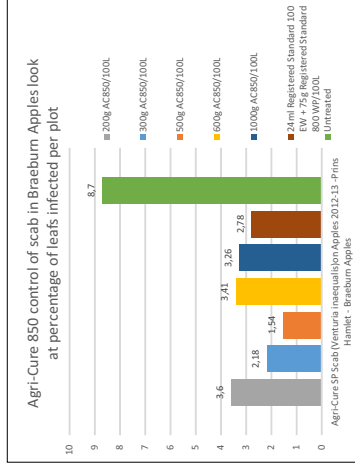

Agri-Cure SP uses the potassium salt concentration to dehydrate the cell of the target pathogen via hypertonic activity. As well as increasing the pH of the leaf which creates an unfavourable condition for the Fungi.

Agri-Cure Details:

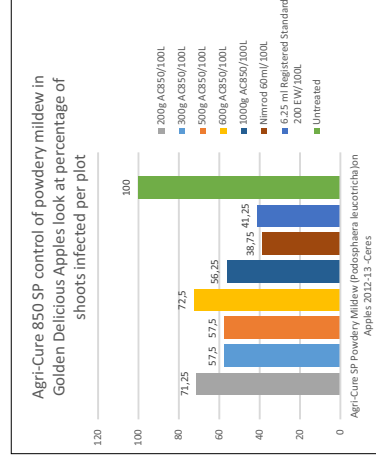

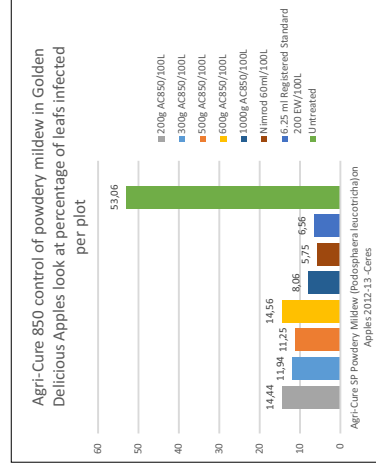

- Act 36 of 1947: L8549
- Active Ingredient: Potassium Bicarbonate
- Formulation: 850g – Soluble Powder (SP)
- Chemical group: Potassium Salt
- FRAC Code: NC
- Poison Class: Group 5
- Colour Band: Green
- CAS No: 298-14-6
- IP code: 4 New Listing
